

The safe preparation, storage and distribution of compounded medications requires disciplined adherence to industry guidelines.

ARE YOU FOLLOWING ALL 104 SAFETY GUIDELINES?

Assess the level of safety guidelines that are associated with your healthcare facility's current practices for preparing compounded sterile products (CSPs). Baxter can help you measure your adherence to safety standards and develop a comprehensive plan designed to help you optimize the safety of your compounding practices.

TAKE STEPS DESIGNED TO HELP ENHANCE THE SAFETY OF YOUR COMPOUNDING PRACTICES.

COMPREHENSIVE CONSULTING

Empower your team to:

- Assess the level of safety that is associated with CSP preparation
- Understand practice gaps in how CSPs are prepared
- Prioritize any potential needs by area

AREAS OF FOCUS

Investigate what matters to your organization:

- Determine the extent to which your organization's policies and procedures adhere to the 104 safety guidelines set by industry guidance documents
- Perform a detailed gap analysis comparing CSP practices to the following guidelines:
 - ISMP Sterile Preparation Compounding Safety Summit: Guidelines for SAFE Preparation of Sterile Compounds
 - ASHP Guidelines on the Safe Use of Automated Compounding Devices for the Preparation of Parenteral Nutrition Admixtures
 - The Second Consensus Development Conference on the Safety of Intravenous Drug Delivery Systems–2008
- Perform a high level assessment of adherence to USP Chapter <797> guidelines: Pharmaceutical Compounding–Sterile Preparations
- Perform a high level assessment of adherence to USP Chapter <1066> guidelines: Physical Environments That Promote Safe Medication Use

METHODOLOGY

Engage our consultant teams to the extent required to meet your specific program needs.

- On-site data collection includes:
 - A review of relevant policies and procedures
 - Direct observations of the operations within the IV room
- Interviews with pharmacy staff and management

DETAILED ACTION PLANS

Depending on your engagement, deliverables may include:

- A detailed report of the findings, by individual guideline
- A summary dashboard

THE BAXTER FACTOR

We are pharmacists, physicians, nurses and IT professionals—each with decades of real-world experience—who share our expertise to help hospitals around the globe improve medication management.
