

Our team of consultants rely on 20 plus years of clinical experience to help customers like you address the complex challenges associated with the growing resistance to antimicrobials. We will focus on the areas that matter to you in support of your goals to improve patient safety and operational efficiency.

ARE YOUR EFFORTS TO REDUCE ANTIMICROBIAL RESISTANCE WORKING?

Develop and strengthen antimicrobial stewardship initiatives in your health-care facility. Baxter can help your organization optimize processes and workflows designed to help you promote judicious use of antimicrobials, reduce healthcare-associated infections and monitor antimicrobial resistance patterns.

BE STRATEGIC IN YOUR EFFORTS TO REDUCE INFECTIONS AND MONITOR ANTIMICROBIAL RESISTANCE PATTERNS.

COMPREHENSIVE CONSULTING:

Empower your team to:

- Assess the level of standardization associated with antibiotic prescribing
- Understand practice gaps in how antibiotics are prescribed
- Implement processes designed for preventing and managing infections
- Reduce the risk of cross-infection in your hospital and community
- Reduce the cost of treating infections

AREAS OF FOCUS

Investigate what matters to your organization:

- Identify gaps in your current program compared to regulatory body standards
- Predict the future state of your resistance patterns without intervention
- Project clinical and financial outcomes for specific antimicrobial stewardship initiatives
- Engage and educate stakeholders and provide guidelines to support appropriate antibiotic prescribing
- Develop, implement and sustain an antimicrobial stewardship program that meets current standards

METHODOLOGY

Engage our consultant teams to the extent required to meet your specific program needs.

- Antimicrobial stewardship program evaluation
- Gap analysis and antibiogram evaluation
- Process and procedure optimization
- Antimicrobial stewardship program development and implementation

DETAILED

Depending on your engagement, deliverables may include:

- An executive overview highlighting potential outcomes
- An antibiogram projection report
- A gap analysis report
- Current outcome metrics
- Vision, mission and objective statements, along with a roadmap to meet program goals
- Stakeholder training
- Clinical guideline flowcharts
- Antimicrobial stewardship campaigns
- A complete antimicrobial stewardship program

THE BAXTER FACTOR

We are pharmacists, physicians, nurses and IT professionals—each with decades of real-world experience—who share our expertise to help hospitals around the globe improve medication management.
