

Baxter offers global expertise in compounding workflow practices to help you assess and identify enhancements to your in-house IV medication preparation capabilities.

DO YOUR PROCESSES ENABLE OPTIMAL—INCLUDING SAFE AND ACCURATE—IV MEDICATION PREPARATION?

Baxter can help your healthcare facility develop and implement a quality system or clinical workflow that adheres to compounding standards designed to help ensure the accuracy and stability of prepared IV medications as outlined in the Compounding Quality Act.

### MOVE FORWARD WITH YOUR BEST PRACTICES FOR IN-HOUSE IV MEDICATION PREPARATION.

#### COMPREHENSIVE CONSULTING

##### Empower your team to:

- Assess the costs and risks of outsourcing IV medication preparation
- Understand the requirements for providing IV medications in-house
- Implement a quality system designed to meet the following FDA standards:
  - Pharmacy Compounding of Human Drug Products per FDA Section 503A of the Federal Food, Drug, and Cosmetic Act
  - Compounding Quality Act (Title 1 of the Drug Quality and Security Act of 2013)
    - Pharmacy Compounding of Human Drug Products per FDA Section 503B of the Federal Food, Drug, and Cosmetic Act governing outsourcing facilities
- Become more nimble in response to IV medication requests and supply issues
- Optimize clinical workflows to help reduce waste through extended dating (where appropriate), room temperature storage and the ability to utilize automated drug cabinets (ADCs) for IV medications

#### AREAS OF FOCUS

##### Investigate what matters to your organization:

- Identify current and future costs and risks of continuing to rely on external resources for IV medications
- Explore requirements to establish and sustain an in-house capability for IV medication preparation
- Implement an established approach to in-house IV medication preparation and distribution

#### METHODOLOGY

##### Engage our consultant teams to the extent required to meet your specific program needs.

- Gather requirements and build a business case
- Offer guidance in the development of policies and procedures to support in-house compounding specific to your hospital or healthcare system
- Work alongside your pharmacy staff to implement a quality system

#### DETAILED ACTION PLANS

##### Depending on your engagement, deliverables may include:

- A business case estimating ROI for in-house fulfillment
- Requirements for space, equipment and staffing
- Facility-specific guidelines aligned to FDA cGMP standards

#### THE BAXTER FACTOR

We are pharmacists, physicians, nurses and IT professionals—each with decades of real-world experience—who share our expertise to help hospitals around the globe improve medication management.
